

Preliminary Eswatini Moths Checklist - PROVISIONAL - May 2023

Photo Credits

Illustrations are from photos of live moths. Those marked with an asterisk are not from Eswatini, and are for reference only. These will be replaced as more photos from Eswatini become available. The observation numbers for those taken within Eswatini are included in the record information for that species.

Photos used to create the illustrations were sourced from the Biodiversity and Development Institute Virtual Museum (<https://vmus.adu.org.za/>), iNaturalist (<http://www.inaturalist.org>), and Project Noah (www.projectnoah.org).
