

# Preliminary Swaziland Moths Checklist - PROVISIONAL - October 2018

## Lepidoptera (excluding Butterflies)

The purpose of this checklist is to provide a start point for compiling a comprehensive checklist of the moths found in Swaziland. It is expected that there will be many additions to this list, the current butterflies list includes about 360 species, so the list for the remainder of the moths is likely to be well over 1000 species. This list probably includes a number of errors and for some species there are only tentative identifications requiring verification.

The checklist has been arranged alphabetically by superfamily, family, subfamily and tribe. Taxonomy follows AfroMoths usage, and, for the Bombycoidea, Kitching et. al. (2018), for family, subfamily, tribe and subtribe.

### Data Sources

- Malolotja and Mlawula Checklists, compiled by Neville Duke in the 1980's and 90's (lists of species only, no record information). It is possible that specimens of taxa included in these lists are in the Ditsong Museum collection.
- UCT-ADU Virtual Museum LepiMAP. (<http://vmus.adu.org.za/>) Many identifications currently still require confirmation, many records still without identifications.
- Project Noah. Photos by Tina Petterson and Pamela Sai Richardson. Some records not yet identified.
- GBIF dataset downloads 2016 and 2017.
- Lepidopterists' Society of Africa. This includes a few of Neville Duke's records.
- Afromoths ([www.afromoths.net](http://www.afromoths.net)). Records compiled from various publications (see below).
- Afromoths ([www.afromoths.net](http://www.afromoths.net)). Photographs of specimens collected by Neville Duke.
- Kovtunovich, V.N. & P.Ja. Ustjuzhanin. On the fauna of Pterophoridae (Lepidoptera, Pterophoridae Hubner) of Swaziland. Amurian Zoological Journal IV(2), 2012. 160-163.
- Hermann S. Staude, Silvia Mecenero, Rolf G. Oberprieler, Allison Sharp, Ian C. Sharp, Mark C. Williams, Marion Maclean. (2016). Metamorphosis **Supplementary Material to Volume 27**.

Not yet included:

The bulk of Neville Duke's collection from Swaziland is believed to be held by the Ditsong National Museum of Natural History, which currently has not been digitized. Information on a few of these is now available from photographs of specimens by Willy de Prins. More of these records will be added as and when the information becomes available.

### Acknowledgements

The compilation of this checklist would not have been possible without the UCT ADU and their experts who have carried out identifications, as well as identifications by Rolf Oberprieler and Roy Goff.
